

AMA RANKING CRITERIA – Agrichemical Handling Facility

Name _____

Address _____

County _____

FSN _____ Tract _____

An Agrichemical Handling Facility will be constructed according to NRCS standards and specifications in order to prevent surface and groundwater contamination as well as reduce the potential for airborne pollutants.

Distance of existing mixing area to surface water:	Points
<100 feet = 25 points 100-200 feet = 15 points >200 = 5 points	
Distance of existing mixing area to well:	Points
< 100 feet = 30 points 100-200 feet = 15 points >200 = 10 points	
Distance of existing mixing area to nearest residence:	Points
< 500 feet = 20 points 500 – 1500 feet = 10 points > 1500 feet = 5 points	
Leaching potential of predominant soil type:	Points
High = 25 points Medium = 15 points Low = 5 points	
Total Points (Maximum 100) =
