

# ENERGY MANAGEMENT (CSP Enhancements)

April 2005

## Enhancement Activity Task Sheet #1

WV-CSPEEM-TS

Name: \_\_\_\_\_

### Worksheet 1 - Energy Audit of Agricultural Operations

Payment: \$500.00 reimbursement for energy audit.

An energy audit will:

- locate all energy sources used in an agriculture operation
- evaluate how energy is used
- quantify the amounts used
- evaluate the efficiency of every energy using activity
- identify changes to operations or alternate energy sources and calculate energy and cost savings based on improvements and changes to each system.

You may hire a professional contractor or utility to conduct an energy audit. You should ensure that the contractor has relevant educational and professional experience, has a successful track record, can provide objective advice, has declared any financial relationships with equipment vendors or service companies, and has qualified staff.

## Energy Audit Certification

I certify that I conducted an energy audit of my agricultural operation.

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Attach receipt from energy audit company.
