

**GRAZING MANAGEMENT (CSP Enhancements)**

November 2005

**Enhancement Activity Task Sheet**

**WV-CSPEGM-TS**

**Worksheet 2 - Rotating Livestock Every 2 Days**

**Payment = \$7.00/ac. /yr. for managing a livestock grazing system by rotating livestock at least every 2 days to a new pasture paddock for the complete grazing season.** Livestock can begin initial spring grazing of bluegrass pastures at 2-3 inches grass height; orchardgrass or fescue at 4-5 inch height. Livestock are moved every 2 days (or more often) to a new paddock to maintain a minimum grass height of at least 2 inches. Successive grazing of a paddock can be made following a regrowth of the following: Bluegrass pasture 5 inches; Orchardgrass, fescue, smooth brome, timothy, or reed canarygrass pasture 8 inches of regrowth. Adequate watering facilities are available to meet livestock daily use. (Note: This activity is not to be combined with the 8 paddock rotation payment)

Attach field worksheets, map of paddock locations and other documentation.

| Pasture Name/Number | Pasture Acreage | Livestock Type | No. Head | Date Moved into Paddock | Date Moved Out of Paddock | Number of Days in Paddock | Minimum Grass Height (Inches) |
|---------------------|-----------------|----------------|----------|-------------------------|---------------------------|---------------------------|-------------------------------|
| Paddock             | 8               | Feeders        | 40       | 4/05/05                 | 4/06/05                   | 1                         | 3                             |
|                     |                 |                |          |                         |                           |                           |                               |
|                     |                 |                |          |                         |                           |                           |                               |
|                     |                 |                |          |                         |                           |                           |                               |
|                     |                 |                |          |                         |                           |                           |                               |
|                     |                 |                |          |                         |                           |                           |                               |
|                     |                 |                |          |                         |                           |                           |                               |
|                     |                 |                |          |                         |                           |                           |                               |

**Managed Grazing Certification**

I certify that I have managed grazing of a 2 day grazing cycle as indicated on the table above.
