

NUTRIENT MANAGEMENT (CSP Enhancements)
CSP Enhancement Activity Task Sheet

WV-CSPENM-TS
November 2005

CLIENT: _____

WORKSHEET 1A—Maintain a 40 foot buffer on all streams adjacent to the Pasture, Cropland, Hayland

Payment = \$1.00 /acre/year of cropland or pastureland to manage and maintain a minimum of 40 foot wide buffer. 100% of all streams and drainage ditches within or bordering the operating unit are protected by these new or existing grass and/or tree buffers. This enhancement cannot be combined with other 100% options and there must be watercourses present on the unit to select this enhancement.

THIS ENHANCEMENT IS REQUIRED FOR THE CURRENT CSP CONTRACT

Buffers provide critical areas for intercepting runoff and improving water quality because of their diverse plant communities, complex structure, deep rooting and close proximity to water.

Refer to the West Virginia Job Sheets *Riparian Forest Buffer* (391), *Field Border* (386) – *Herbaceous Field Borders for Wildlife* and/or *Pasture and Hayland Planting* (512) – *Warm Season Grass Establishment for Wildlife* and/or *Riparian Herbaceous Cover* (390) for species of vegetation that are beneficial, the seeding rates, management and maintenance of this practice.

Certification of Management and Maintenance of a 40 ft Buffer on all Streams and Ditches

Farm# _____ **Tract #** _____

Field #	Installed Width	Grass/Tree Species

I certify that I have managed and maintained a 40 foot buffer on all streams and ditches as listed above and as outlined in the job sheet(s) I was provided.

Client's Signature: _____ **Date:** _____

CSP Enhancement Activity Task Sheet

November 2005

CLIENT: _____

WORKSHEET 1C – Maintain a 60 foot riparian forested buffer on all perennial streams

Payment = \$3.00 /acre/year of cropland or pastureland to manage and maintain a minimum of 60 foot wide buffer. All perennial streams within or bordering the operating unit are protected by these new or existing grass and/or tree buffers. This enhancement cannot be combined with other 100% options and there must be watercourses present on the unit to select this enhancement.

THIS ENHANCEMENT IS REQUIRED FOR THE CURRENT CSP CONTRACT

Buffers provide critical areas for intercepting runoff and improving water quality because of their diverse plant communities, complex structure, deep rooting and close proximity to water. Wildlife may be permanent residents of the riparian area or occasional visitors that use the area for food, water, connective corridors or temporary shelter

Refer to the West Virginia Job Sheet *Riparian Forest Buffer* (391), *Pasture and Hayland Planting* (512) – *Warm Season Grass Establishment for Wildlife* and/or *Field Border* (386) – *Herbaceous Field Borders for Wildlife* and/or *Riparian Herbaceous Cover* (390) for species of vegetation that are beneficial to wildlife, the seeding rates, management and maintenance of this practice.
