|--|---|
| | Measures will be installed (mechanical, grass and/or trees) to protect streambanks from erosion. Conservation practices include, but are not limited to, stream crossing, vegetative filter strip, riparian buffer, mechanical protection methods, and/or stabilization of critically eroding streambanks. This application applies to all agricultural land associated with streambank erosion. All conservation practices must meet USDA Natural Resources Conservation Service (NRCS) Field Office Technical Guide standards and specifications. |
